1.

2. On 3 September, no guns were observed in the AAA emplacement at the runway south of the installation. The emplacement was guarded by sentries.

3. On 9 September the quarters of Units Tulenev and Chesnakov were heavily occupied. A 132-mm rocket launcher [ ] left the installation toward Boetzow. Two officers wearing red-bordered black epaulets with tank insignia were seen in the barracks area.

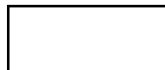

4. On 3 September, the Flugplatz Kaserne in Schoenwalde was occupied by about 200 to 300 troops. Sentries observed wore red-bordered black epaulets. Little activity was observed only at the two firing ranges in the north section of the installation and northwest of the main gate, west of the road to Boetzow. Six

Shesakov (fnu); and major elements of the 31st AAA Div, under the command of the known Colonel Tulenkov (fnu), can be carried at their quarters on 9 September. Source of paragraph 4 probably was mistaken or major elements of the troops were temporarily absent from the installation for training during the period under review.
